

AJEETH T

Cloud DevOps Engineer

India | Mobile: +91-994-066-2303 | Email: ajeetht2394@gmail.com |

PROFESSIONAL SUMMARY

Experienced **DevOps Engineer** with 9 years of overall IT experience, including **5 years of specialized experience in DevOps, Cloud Infrastructure, Automation, CI/CD, and Infrastructure Management**. Proven expertise in designing and implementing robust CI/CD pipelines, automating infrastructure and expertise in **AWS, Azure, Kubernetes, Docker, Jenkins, Terraform, Ansible, Git, Grafana, and Linux**, with a strong track record of building scalable, secure, highly available, and production-ready environments.

CORE SKILLS

- **DevOps Tools:** Jenkins, GitHub Actions, GitLab CI/CD, SonarQube, JIRA
- **Cloud Platforms:** AWS (EC2, S3, Lambda, EKS), Azure
- **Infrastructure as Code (IaC):** Terraform, AWS CloudFormation, Ansible
- **Build Tool:** Maven
- **Artifact Management:** Nexus
- **Containerization & Orchestration:** Docker, Kubernetes
- **Monitoring & Logging:** Prometheus, Grafana
- **Operating Systems:** Linux, Windows
- **Version Control:** Git, Bitbucket
- **Scripting & Automation:** Python, Bash, PowerShell
- **Configuration Management:** Ansible, Puppet, Chef
- **Security & Compliance:** Vault, AWS Secrets Manager, vulnerability scanning
- **Ticketing Tools:** Jira, ServiceNow
- **Soft Skills:** Root Cause Analysis, Escalation Resolution, Team Leadership, Training & Development
- **AI Tools:** Copilot, Claude co-work, Claude code

CERTIFICATIONS

- AZ-900 - Fundamentals of Azure
- ITIL 4

WORK EXPERIENCE

Wells Fargo, Bangalore & Chennai, India | Cloud DevOps Engineer | Apr 2021 – Jun 2026

Responsibilities;

- Designed, implemented, and maintained end-to-end **CI/CD** pipelines using **Git, GitHub, Jenkins, Maven, Docker, Ansible, SonarQube, and Nexus**, improving build reliability and deployment speed.
- Configured and managed **Jenkins Master-Agent architecture**, integrating **Maven and Apache Tomcat** to optimize build, test, and deployment workflows.
- Built scalable **AWS** infrastructure using **Terraform** with reusable modules, reducing manual provisioning effort by **up to 90%**.
- Automated **EKS cluster** provisioning with **Terraform and Ansible**, and deployed containerized microservices using **Docker and Kubernetes, ensuring high availability, scalability, and fault tolerance**.
- Developed custom **Helm charts** for standardized **Kubernetes deployments** and implemented Horizontal Pod Autoscaling (HPA) for dynamic workload scaling.
- Designed and deployed AWS Three-Tier Architecture using **EC2, ALB, Auto Scaling Groups, Route 53, RDS, and S3 with secure VPC** configurations for high availability and performance.
- Automated configuration management, patching, and software installation using **Ansible playbooks**, improving environment consistency across Dev, QA, and Prod.
- Integrated **Prometheus, Grafana, CloudWatch, and SNS** for real-time monitoring, alerting, and visualization of **Kubernetes clusters and AWS resources**.
- Implemented **S3 lifecycle policies**, Intelligent-Tiering, and developed **Python scripts** for cloud resource

optimization and operational automation.

- Managed **GitHub repositories**, branching strategies, static code analysis with **SonarQube**, artifact management with **Nexus**, and collaborated in **Agile/Scrum** teams to reduce CI/CD cycle time and deployment failures.
- Built and deployed **Docker containers**, leveraging **Kubernetes** for scaling and orchestration while maintaining YAML based configurations.
- Configured **Kubernetes objects** such as **Pods, Deployments, Services, ConfigMaps**, and Replication Controllers
- Monitored and optimized production environments using **Grafana and Prometheus**, enabling proactive issue resolution and performance tuning.
- Integrated **Prometheus & Grafana** for real-time monitoring and alerting, ensuring system reliability and proactive issue resolution.
- Optimized cloud infrastructure performance by troubleshooting and fine-tuning **Windows & Linux environments**.
- Designed and automated end-to-end **CI/CD pipelines**, optimizing the build and deployment process for enhanced efficiency and user experience.
- Collaborated with **development teams** to resolve deployment issues, **debug application errors**, and enhance system reliability.
- Managed and deployed **Java-based applications** on **Tomcat** and **Apache servers**, ensuring high availability and scalability.
- Utilized **Docker Hub** for container image management and optimized deployment processes by writing Automated infrastructure provisioning and configuration using **Terraform, Ansible, and Kubernetes**, improving operational efficiency.
- Proactively identified and resolved **IT errors**, reporting critical insights to clients and management for **continuous improvement to ensure seamless containerized application deployment**.

HCL Technologies, Chennai, India | Senior Analyst | Jul 2019 - Apr 2021

Responsibilities

- Delivered Tier 2 IT support and resolved technical issues across multiple systems.
- Configured hardware and managed system permissions for new employees.
- Applied troubleshooting procedures to analyse and resolve technical faults.
- Supported network and software troubleshooting to maintain system availability.

Cognizant Technologies, Chennai, Tamil Nadu | Senior Process Executive | Jan 2019 - Jul 2019

Responsibilities

- Provided Tier 1/1.5 IT support and resolved escalated technical issues.
- Utilized ticketing systems to manage support actions and requests.
- Assisted customers in troubleshooting and restoring service functionality.

AGS Health PVT.Ltd, Chennai, Tamil Nadu | Junior Process Associate | Jul 2017 - Dec2018

Responsibilities

- Delivered technical support and guided users through troubleshooting tasks.
- Assisted with hardware/software installations and configurations.
- Ensured timely resolution of technical issues to maintain business continuity.

EDUCATION

- Bachelor of Engineering (B.E) in Mech from Anna University Karpaga Vinayaga College Of Engineering, Chennai, India - GPA: 63 – 2016

Achievements

- Received client appreciation for on-time deployment and successful project deliver
